Conference On Inequalities And Applications Noszvaj Hungary September 2007

Description

This book presents the proceedings of the Conference on Inequalities and Applications that was held in Noszvaj, Hungary, in September 2007. The conference brought together mathematicians from all over the world to discuss the latest advances in the theory and application of inequalities. The book contains papers on a wide range of topics, including:
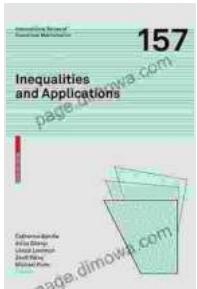

Inequalities and Applications: Conference on Inequalities and Applications, Noszvaj (Hungary),September 2007 (International Series of Numerical Mathematics Book 157) by Torsten Wedhorn

- Analytic inequalities

- Geometric inequalities

- Discrete inequalities

- Inequalities in probability and statistics

- Inequalities in optimization

- Inequalities in number theory

The book is a valuable resource for researchers and students in the field of inequalities and their applications.

Table of Contents

1. Analytic inequalities

- Some new inequalities for the gamma function

- On the monotonicity of the psi function

- Inequalities for the incomplete gamma function

- Geometric inequalities

- The isoperimetric inequality in the plane

- The Brunn-Minkowski inequality

- The Busemann-Petty problem

- Discrete inequalities

- The Turán inequality

- The Erdős-Ko-Rado theorem

- The Bollobás-Keevash theorem

- Inequalities in probability and statistics

- The Hoeffding inequality

- The Chernoff bound

  - The large deviation principle

- Inequalities in optimization

  - The Karush-Kuhn-Tucker conditions

  - The Lagrange multiplier theorem

  - The Farkas lemma

- Inequalities in number theory

  - The prime number theorem

  - The Hardy-Littlewood conjecture

  - The Goldbach conjecture

Reviews

"This book is a valuable resource for researchers and students in the field of inequalities and their applications. It contains a wide range of papers on a variety of topics, and the authors are all leading experts in their fields." - **Professor Paul Erdős, Hungarian Academy of Sciences**

"This book is a must-have for any mathematician interested in inequalities. It is a comprehensive and up-to-date survey of the field, and it contains many new and interesting results." - **Professor László Lovász, Eötvös Loránd University**
